

Safer Portsmouth Partnership

Adult drug treatment plan 2009/10

Part 2: Local partnership priorities for effective engagement of drug users in treatment

1. Drug users in effective treatment

	2007/08 Baseline	2008/09	2009/10	2010/11
Problem drug users (crack and/or opiate users) recorded as being in effective drug treatment	615	646	659	672

	2007/08 Baseline	2008/09	2009/10	2010/11
All adult drug users recorded as being in effective treatment	661	694	708	722

2. Additional partnership information – primary care

Primary Care Trust (PCT)	Portsmouth			
Number of primary care practices in PCT area covered by partnership				29
	2008/09		2009/10	
	Number	Percentage	Number	Percentage
Practices who are delivering primary care-based treatment within a commissioned service model	15	52%	15	52%

3. Local drug partnership priorities linked to drug strategy delivery

Where the partnership has identified key priorities in Part 1 in the following areas please indicate with a tick (√) in the list below

Access	Partnership priority for 09/10 (√)	Satisfactory baseline (√)	% change sought as local priority
Improved access to treatment – crack	√	√	+ 3% penetration
Improved access to treatment – BME	√	√	Nil – issue more complex, see note
Improved access to treatment – parents			

BME access – although % access is in line with local population, this mostly represents people from outside of City accessing system via T4, therefore does not represent penetration of local BME communities; hence, although a priority to improve this, it will require a more sophisticated tracking of clients than a simple % increase could reflect.

Effective engagement of new clients	Partnership priority for 09/10 (√)	Satisfactory baseline (√)	% change sought as local priority
Improved engagement – crack	√	√	+ 2%
Improved engagement – BME	√	√	+ 2%
Improved engagement – parents			
Improved engagement – criminal justice			
Improved engagement – under 25s	√	√	+ 1%*

*proposed changes to service to improve access for under 25s are part of long-term service change, so will not have positive impact this year.

Treatment exits	Partnership priority for 09/10 (√)	Satisfactory baseline (√)	% change sought as local priority
Improved successful treatment exits- all clients	√	√	+ 6%
Improved successful treatment exits- crack	√	√	+ 6%
Improved successful treatment exits- BME	√	√	+ 2%
Improved successful treatment exits- parents	√	No – better recording of status needed	
Improved successful treatment exits- criminal justice	√	√	nil **
Improved successful treatment exits- Under 25s	√	√	+ 4%

** although our lowest successful completion rate, our treatment system is set up for CJ clients to transfer to mainstream services at completion – which does not record as a successful completion under NDTMS categories – hence not appropriate to set a % increase for this client group.

Employment	Partnership priority for 09/10
-------------------	---------------------------------------

Improved employment outcomes for individuals in treatment	Improve TOP review and final completion by 220% (currently only 25% complete, aim 80% complete)
---	--

Housing	Partnership priority for 09/10
Improved housing status – all clients	Improve TOP completion as above.
